

Folding your tetrahexaflexagon

1. Hold the zig-zag with the glue triangle facing you bottom left.
 2. Fold the middle two butterfly wing triangles together
 3. Fold the caterpillar tail-segment triangles together
 4. Fold the butterfly hindwing triangles together
 5. Fold the three triangles with forewings and nettle leaf tBEHIND
 6. Fold the forewing triangles together
 7. Bring the GLUE tab in front and glue down the LIFE triangle.
- Now see if you can find all four stages of the Peacocks life cycle.
 - Can you reveal them in order?

Metamorphosis: Find the butterfly.

Can you find all four stages of the Peacock Butterfly's life-cycle?

1. Cut out round the red outline.
2. Carefully fold along all the lines.
3. Fold in and glue all the triangles EXCEPT the one saying LIFE
4. Cut into the hexagons along the lines
5. Fold in and glue the new triangles.
6. You should not have a double sided zig-zag
