In Defense of Guess-and-Check

by Sarah Lonberg-Lew Problem solving is a lot more than reading a short story problem and performing one or two calculations. Real problem solving is what happens when you can't see a clear path to a solution and have to be creative. There are many great problem-solving strategies: look for a pattern, examine a simpler ... Integrating Statistics in the Content Areas

This post originally appeared in the December 2018 edition of Reflect & Connect: The Reflective Practitioner, managed by our colleagues at the SABES ELA Center. This is a companion blog post to "The Case for Statistical Literacy Across Content Areas". by Melissa Braaten Interested in incorporating statistics into your content classes, but not sure what this might look like in practice? There are ways to get students involved with ... [Continue reading Integrating Statistics in the Content Areas](#)
