

TERC Apps Home

For years, TERC - a not-for-profit math and science education entity in Cambridge, Massachusetts - has developed, researched, and produced a wide range of educational materials in a variety of formats. We are now pleased to be bringing a number of these materials and experiences into the app format.

Zoombinis

Zoombinis is a logical puzzle game in an adventure setting.

For assistance with Zoombinis, see our [Support](#) page.

To contact us, please [send us a message](#).

EarthLabs

EarthLabs is a collection of earth science educational modules and visualizations in app format. It is free in the iOS App Store.

See [here](#) for more information on EarthLabs.

Quantum Spectre

Ravenous

Impulse

Quantum Spectre, Ravenous, and Impulse are a series of games done by the EdGE - the Educational Gaming Environments group at TERC. They are available for free in the iOS App Store, Google Play, Amazon, and on the web.

For more information about Impulse, Ravenous, and Quantum Spectre, see [EdGE at TERC](#).
