

GeniGUIDE

GeniGUIDE

The goal of the GeniGUIDE project is to improve student learning of genetics content by developing and researching a layered learner guidance system that aids students and informs student-student and student-teacher interactions. SEEC will document the development and research process and evaluate how the GUIDE system is used and contributes to the teacher and student experience.

Clients and Collaborators:

Concord Consortium, North Carolina State University

Funder:

National Science Foundation - DRK12 (DRL1503311)

Our Role:

External Evaluator

Project Staff:

[Karen Mutch-Jones](#), [Santiago Gasca](#)
