

Innovate to Mitigate Challenge

Good news!

We're recruiting teams for the 2020-2021 school year! See the project [timeline page](#) to pre-register for the project starting in the Fall of 2020.

The Challenge

Innovate to Mitigate wants students or student groups to submit ideas about how to address climate change by reducing greenhouse gases.

People around the world are working hard on this problem. To meet the big challenges we face, we need good ideas from everyone. This challenge encourages young people to unlock their immense potential for finding solutions!

Students compete for a chance to win prize money and earn recognition from peers, community, and experts.

How will the [challenge work](#)?
